Family Support Tool Kits

Autism Speaks offers four specific guided tool kits to help family members and friends of individuals who have Autism to better understand the diagnosis and the effects it can have on families. Each tool kit provides an array of resources and explanations of the types of support needs families may have. The four individual tool kits are written with a specific target audience in mind including, parents, grandparents, siblings, and friends.

For more information and to access a tool kit, check out the Autism Speaks website at:
